PROFESSIONAL SUMMARY

Results-driven BE AIML graduate (2026, CGPA 8.2/10) with hands-on training at JSPiders in Java Full Stack Development. A background in Artificial Intelligence combined with full stack Java skills provides a unique edge in building AI-integrated web applications. Proficient in Java, Spring Boot, React.js, JDBC, Hibernate, RESTful APIs, MySQL, Oracle SQL, Git, and GitHub. Built 3 scalable projects including a Smart Job Portal with resume matching logic, a real-time Code Collaboration Platform, and an AI-based Assistive Companion. Open to relocate anywhere for Java Full Stack Developer, SDE, or IT roles.

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, HTML, CSS, SQL
Frameworks	Spring Boot, Spring MVC, Hibernate, JPA, JDBC, React.js, WebSocket
Databases	MySQL, Oracle SQL
Tools	Git, GitHub, Maven, Postman
Concepts	REST API, OOP, Agile / Scrum, SDLC, Role-Based Access Control

TRAINING & INTERNSHIP EXPERIENCE

JSpiders Rajajinagar, Bengaluru | Java Full Stack Trainee Feb 2026 – Jun 2026

- Developed full stack web applications using Java, Spring Boot, JDBC, Hibernate, JPA and REST APIs.
- Designed and integrated backend services with relational databases (MySQL/Oracle) using Spring Data JPA.
- Built responsive user interfaces using React.js and connected frontend with backend REST APIs.
- Practiced Git workflows including branching, merging, and pull requests for collaborative version control on GitHub.

PROJECTS

Smart Job Portal with Resume Matching *Java, Spring Boot, React.js, MySQL, REST API*

- Developed a full stack job portal enabling job posting, application tracking, and user authentication for recruiters and candidates.
- Implemented resume-based job matching logic to recommend relevant job roles based on skills and keywords, reducing irrelevant job suggestions by ~60%.
- Built RESTful APIs with Spring Boot and integrated React.js frontend with MySQL database for dynamic data handling.

Online Code Collaboration Platform *Java, Spring Boot, WebSocket, React.js*

- Developed a real-time collaborative coding platform supporting 5+ concurrent users with sub-100ms sync latency.
- Implemented WebSocket-based communication for instant code updates and synchronization across all connected clients.
- Designed scalable Spring Boot backend services and interactive React.js frontend for seamless multi-user experience.

AI Companion for Visually Impaired *Python, OpenCV, Tesseract OCR, pyttsx3, Raspberry Pi*

- Achieved ~90% OCR accuracy on printed text — built a real-time assistive system capturing text from signboards, labels, and documents via webcam.
- Integrated Text-to-Speech using pyttsx3 and deployed the solution on Raspberry Pi for a portable, low-cost accessibility device.
- Exposed OCR results as a REST API endpoint using Spring Boot, enabling integration with external Java-based services.

EDUCATION

Don Bosco Institute of Technology, Bengaluru | B.E. — Artificial Intelligence & Machine Learning Expected Jun 2026
CGPA: 8.2 / 10

CERTIFICATIONS

- Java Full Stack Development** — JSpiders (Java, HTML, CSS, JS, Spring Boot, Hibernate, Oracle SQL)
